Name: _____ **Date:** _____

Make a sketch of your built and describe how it works.

Note down what you added in your program about the costumes the values of the tilt sensor.

Make the following match and add the commands in your program.

	Moving upwards
	Moving downwards
	Moving left
	Moving right

Experimentation:

Click the green flag and after you get familiar with directing the plane, press the space button.

Beware! If you touch the tree, the clouds, or the ground for a long time, you lose! Enjoy your flight!!!
