Name: _____ **Date:** _____

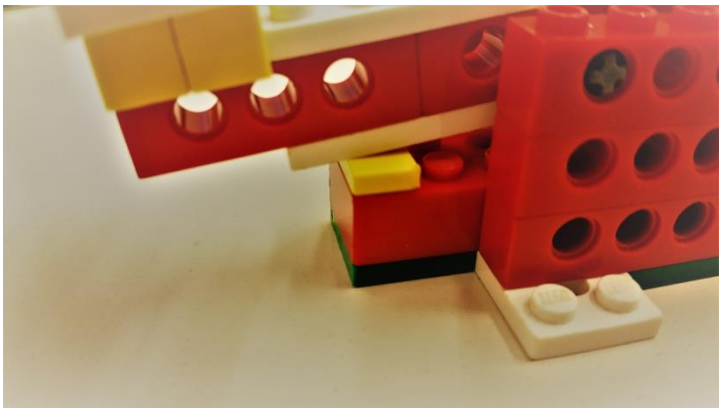

In the basket you built, what is the role of the lever? Draw the fulcrum, the load and the force.

What type is the lever you built?

Try to shoot. Do you have any problems? What should you pay attention to?

After you resolve any possible problem, try to shoot, and score as many points as you can within 2 minutes. Repeat 2-3 times and compete with your classmates.

If you face problems, you can do the change you see in the picture, or any other modification that can help you.

What is the difference between an 1-point shoot and a 3-point shoot regarding the force? Write down a few words or draw a picture.
